NUMEROLOGY AND NAMES

The Greek philosopher, Pythagoras, worked out a theory of numbers. He believed all human history could be divided into cycles. He measured those cycles with the numbers from one to nine. Modern numerology says that these numbers reflect the cycles of history and of individual lives. So, numerology uses a formula to reduce important data -- names, dates, etc., - to these numbers.

Numerology is fun and a fascinating subject. For those of you who share a passing interest, here's a simplified explanation of how to test the names you're considering for your baby.

Every letter has its own value.

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
1	2	3	4	5	6	7	8	9	1	2	3	4	5	6	7	8	9	1	2	3	4	5	6	7	8

Write down the names you've been considering for your baby; first, middle, and your last name. Then write the corresponding number under each letter of the complete name. Add it up and get the total. You'll get a two-digit number. Add those two numbers together to get a number from one to nine.

THE MEANING OF NUMBERS

NUMBER ONE

The person who has number 1, is a dynamic personality, independent, original, creative, a hard worker. He gets things done, encourages, advises and drives others. If he will use these qualities positively, his life will be successful.

This number is ruled by the Sun, and stands for all things masculine, such as courage, leadership, decision and willpower. Number 1 people are predominantly mental types and are introverted. Those who have number 1 strong can only fail if they are indecisive, lacking in confidence, lazy and allow themselves to be led by others. They can also fail if they become over-positive, dominant, egotistic and intolerant.

When applied to future events, number 1 indicates new starts, the launching of new projects, personal or business. Success if the past is left behind, a time to be determined, active and courageous.

Affinities -- 2, 4, 7. Colours -- yellow / gold / bronze. Fortunate day -- Sunday.

NUMBER TWO

Number 1 and 2 go together; they are polarities for, number 2 is as essentially female as number 1 is masculine. Number 2 people, should ideally exhibit the best of the womanly qualities, that is gentleness, tact, adaptability, understanding and wisdom.

Number 2 is ruled by the Moon, and so to you the home, family and peace and harmony in relationships are very important. They should be the ones to make for harmony and beauty in their surroundings and they should never push for things, but gain them through their quiet, gentle, diplomatic ways and capacity to handle others.

Number 2 people can fail if they fall into negative ways, accepting everything which is dealt out to them without protest, being over-tolerant, obsessive about detail and worrisome, not being able to adapt themselves to others and losing out by being moody, touchy and easily upset.

People with this vibration predominant can be either too 'bottled up' or over-emotional so, they need to keep a balance for success and happiness. Their warmth, sympathy and understanding attract others.

Regarding future events, number 2 warns of the need for caution, a wait-and-see attitude, the time for decision is not yet.

Affinities -- 1 and 7. Colours - all pale and pastel shades. Fortunate day -- Monday.

NUMBER THREE

Number 3 always relates to self-expression, so you must always try for personal self-expression in

creative ways, for this number gives you talent where writing and speaking are concerned.

Number 3 endows its children with a basically happy, optimistic, carefree nature, so, they must not be imprisoned or forced into too practical ways, for, this number tells that they were born to encourage and entertain others.

A creative outlet is essential for success through acting, singing, dancing, music or other forms of creativity.

The number 3 is essentially related to Jupiter, planet of abundance, joy, good luck, so you feel the need for breadth of contacts, social life, friends and a job which is not too practical and down to earth.

Failure comes to the number 3 if you do not develop your potential and instead of being a joy-bringer you are a pessimist and a killjoy. You can also fail by being too restless, by never sticking to anything, and by worrying unduly you can make yourself and others into nervous wrecks.

Overdevelopment of your basic characteristics can also lead to failure through a tendency to self-advertisement, boasting and conceit. Snobbism and cynicism are also negative 3 traits.

Success comes to the number 3 when you develop and use your gifts, then your life brings happiness to others and you are fulfilled yourself. For the future it gives the green light and suggests Lady Luck is around.

Affinities -- 6 and 9. Colours – and shades of violet and purple. Fortunate day -- Thursday.

NUMBER FOUR

Number 4 people are predominantly strong-willed and so 4 people can be powerfully constructive, true builders, willing to work and attend to details, or they can be equally powerfully destructive.

Naturally number 4 people will be successful if they are prepared to work to develop their skills in order to be of service to others. They should be reliable, responsible and patient, for, upon their work and sound constructive abilities many vast edifices are based. Routine, detail and system are very important to them and they dislike change unless advised of it well in advance. Tenacious, obstinate and determined, they get things done.

Number 4 is related to the planet Uranus in its more Saturnine construction, and therefore, number 4 is rated a relatively restrictive number and vibrates on an earth quality.

It may be said that the strongly 4 person has to face definite limitations and restrictions, but his powerful willpower and determination, allied with creative imagination, enable him to override difficulties and reach success -- a service of some kind is often the best for him.

He can fail if he uses his willpower in purely destructive ways to rebel against practically everything, to argue and debate endlessly and even use violence to reach his ends.

On the negative side, too, he can be stubborn to a fault, unreliable, weak, careless and lacking in concentration. For the future it shows the time to

slow down and work for change in the future.

Affinities -- 2 and 8. Colour -- gray. Fortunate day -- Saturday.

NUMBER FIVE

Number 5 gives quickness of thought and action, a love of freedom, change and variety. These people are truly mercurial; they are progressive in thought and hate to be tied down to routine or monotony.

They flourish where things are going on and generally choose a public career related to travel, salesmanship, the creative arts, adventure, communication in one of its forms.

Number 5 is ruled by the planet Mercury, and so the number 5 person has a brighter than average mind and has to use his creative powers constructively to be happy and successful. Thought and communication are very important to him and he can, therefore, fall down on this vibration by using his mind destructively and so make himself ill while others unhappy.

Negatively he can be destructive and pessimistic or else just plain unreliable, deceitful, a confidence trickster, using his glib tongue and power over speech to fool and defraud others. When acting negatively, he avoids all responsibility and tries never to 'carry the can'.

Number 5 is also the number of sex attraction and magnetism, and number 5 people are generally strongly attracted to the opposite sex.

For the future it demands 'get about', move, change, communicate, invest in your own talents, take a chance.

Affinities -- all groups, but especially their own '5'. Colours -- all light, shining colours. Fortunate day -- Wednesday.

NUMBER SIX

Number 6 is the number of the romantic idealist. Number 6 is sympathetic, attractive and loving. It inclines the person to strive for love, his own home and hearth fire.

You'll have a very strong desire for harmony and beauty around you, whether this is in your home, community or group. You are basically conservative in your views and ideas.

Your ideals always drive you on to seek for improvement in everything you touch, and you have a flair for beauty, colour and art.

With this number strong you are essentially a practical person and can accept responsibility, whether in the home or in the wider sphere of community or organization.

Happiness to the number 6 is essentially sharing and harmony in relationships, hence the importance of forming the right relationships. It is a number ruled by the planet Venus so that there is artistic ability as well, which is often expressed in the home environment and in clothes if not actually in other creative work.

Success comes through diplomatic balancing and handling of the difficult temperaments the number 6 will inevitably encounter in their immediate surroundings, and the giving of willing service.

Failure arises through an insistence on your own ideals,, a too narrow, exclusive attitude to loved ones,

friends and possessions. There can be jealousy and interference with others and continual complaints which lead to quarrels.

For the future this number shows that matters have to be adjusted in the home and possibly between partners, as it is a number which rules both marriage and divorce. 'Do not delay' is the message.

Affinities -- 6, 3 and 9. Colours -- Blue and Pink. Fortunate day -- Friday.

NUMBER SEVEN

Number 7 people are introverted and the thinkers, mystics and philosophers of this world. Understandably then, you who come under its vibration tend to be silent, secretive, selective, solitary and aloof. You are strongly individualistic, sense a great deal, but say little.

Number 7 is ruled by Neptune, the inspirational, illusive planet, the planet of the heights and depths. Those with 7 strong can be markedly creative and artistic if they use their gifts positively.

You have the capacity to see through things, to reach a more spiritual reality and you do not fit in easily with the hustle and bustle of the modern world.

Essential to the success of the number 7 are peace and quiet and communion with their inner selves. Sacrifice of some kind usually enters into their lives whether as children or adults, for, this is the number of soul growth.

When we speak of the heights and the depths, the heights alluded to the inspirational/spiritual insight conferred by the number. The depths referred to the

illusionary side of the 7, and the wearing of rose-coloured spectacles.

The illusionary side leads to the desire to escape from reality and this can come about in various ways through refusal to face the self and problems as they really are. This can lead to drugs, drink, promiscuity and illness etc.

Living up to the highest in your nature you can be the mystic or creative artist and find success through following the truths which you unearth from your inner self.

When this number comes up for the future, a beautiful aura of self-description can make life difficult; relationships do not last; contracts should not be entered into. There is a need for self-examination and facing the truth.

Affinities – 1, 2 and 4. Colours – pastel shades, white and pale grey. Fortunate day -- Monday.

NUMBER EIGHT

People who come strongly under this number are realists, good organizers, energetic, ambitious and capable. Their vibration is of earthly and material power, so you number 8 people are often attracted to 'big business' and to the organizations which stand for this.

You are people who have a good eye for value. You are discriminating and authoritative, prepared to work relentlessly towards your goal.

If working for material power only you will not find success. You have to incorporate ideals and doing things for others into your philosophy, then you are better prepared to withstand the obstacles

and disappointments you will have to surmount to achieve your ambitions.

Mistakes can be made on this vibration if number 8 tries to drive too hard, yourself and others, and misses out on the spiritual side of life. You find success if you will temper justice with mercy and do not neglect the emotional and spiritual sides.

Number 8 is often associated with marriage, for number 8s are more dependent upon others than they would like to admit. You need love and affection, but find it difficult to express your feelings.

Marriage in this connection has often something to do with security and money. Number 8 is ruled by the planet Saturn, so number 8 people have to work and keep working to achieve their goal and stay there.

Success for them is to be found in the world of material values and power.

In predicting for the future, number 8 warns that this is no time to stand still. One must go ahead but be prepared to work and take responsibility. Marriage is a serious affair based on financial security.

Affinities -- 2, 4. Colours -- all dark shades from brown to black. Fortunate day -- Saturday.

NUMBER NINE

People who have number 9 predominant have energy and drive, optimism and generosity coupled with great compassion. It is the vibration of energy which is to be used for universal service and love.

You are never pretty or small, but grasp broad principles and contacts. You are strongly intuitional

and creative, but your true fulfillment only comes through service, tolerance and a capacity to be fair in all your dealings. You are leaders and have the drive, courage and optimism to pull success out of disaster.

You succeed through using your energy and drive in fields which will give you broad scope for usefulness, and in particular those under this number are often drawn to travel, communications and foreign fields of service and enterprise; such field where your drive, imagination and sense of adventure will not be stifled and where your need to serve will bring you happiness and fulfillment.

You can fail if you allow selfishness and narrow-mindedness to enter into your thinking and attitudes. You will find life tries you on these scores.

Number 9 is associated with the planet Mars, and so gives a strong character, independence and assurance.

When this number is shown for the future, nothing new should be begun, for 9 being the end of a cycle, shows this is the time to pick up loose ends and gird the loins for new ventures in the future. It represents termination where a relationship is concerned.
